

# TeamMate 360: Working with Managers

## TeamMate 360:

### Exponential Training & Assessment:

**Ellena Moore, TeamMate 360 Administrator**

*"I was surprised how simple the system is to use. I can set up assessments quickly and as soon as all respondents have completed their questionnaires, the reports are ready for use."*

Ellie Moore, T360 Administrator

### Summary

This case study is based on one of the TeamMate 360 administrators and describes how easy the system is to use.

### Challenges

Ellie commented:

"My role is very busy as I am responsible for coordinating and managing numerous projects and processes. Time management is very important to me and therefore I need digital tools like TeamMate 360 to be simple and easy to use. I find the tool's management screens are simple to understand making TeamMate 360 easy and straightforward to use."

## The Outcome

During the TeamMate 360 pilot phase, Ellie managed the assessment of thirty assessments. The time to set up and complete the T360 assessments was minimal. Ellie said she likes using the tool as it does most of the work for you!

## Results and Future Plans

Exponential Training is planning to develop other versions of the TeamMate 360 assessment tool to assess managers, coaches, team leaders and directors. Work will start on these new developments by June 2019.

Ellie setting up another TeamMate 360 assessment.

*"If only all of the digital tools that we use in our company worked as well as TeamMate 360 life would be much simpler. I believe our company has plans to develop other versions of the assessment model which is very exciting."*

Ellie Moore, TeamMate 360 Administrator

Teammate 360 is a project funded by the Erasmus+ programme.

The project aims to help managers and enterprises involved in the management of remote workers and virtual teams.

During the project, managers completed a 360-degree skill assessment and took part in a course called The Remote Manager.

A key part of the project was the development of an easy-to-use digital platform used to capture feedback from respondents and then to generate the TeamMate 360 report.
